

Sternwood Eco Delux

Surface Cleaning & Maintenance Instructions

Use the instructions below to clean and protect the Sternwood Eco Delux surface. Always avoid abrasive or harsh materials to maintain the finish and prevent damage.

01

LIGHT MARKINGS

Clean with a soft, clean damp cloth or sponge. The surface must be totally dry after cleaning.

02

HEAVIER MARKINGS

Clean with a clean cloth and warm water using normal domestic cleaners or dish soap. Domestic cleaners should contain no abrasive ingredients. Surfaces should then be wiped with fresh water to remove all traces of the cleaning agent. A final wipe with a dry clean cloth or paper towel should assist in preventing streaks.

DO NOT USE THE FOLLOWING CLEANING MATERIALS

- Detergents with strong acids and acidic salts
- Polish, washing powder, furniture cleaner, or bleach
- Scouring and abrasive pads, including abrasive powders, scouring pads, and steel wool
- Steam cleaning equipment

Important: Always dry the surface after cleaning. Leaving cleaning agents or water on the surface may cause streaking or reduce the quality of the finish over time.
